Guidelines for conduction of Continuous Internal Evaluation (CIE) under CBCS Pattern

Student evaluation is an important process for monitoring the students' academic progress and to ensure attainment of desired learning outcomes of various levels. If planned thoughtfully and executed carefully, evaluation outcomes can be effectively used to improve the learning experiences of the students. Under CBCS pattern, students' evaluations are expected to be conducted as frequently as possible.

Internal evaluation can be graded or non-graded in nature. The purpose of non-graded internal evaluation is to monitor students learning, give timely feedback & corrective feedback, help students to prepare for graded internal evaluations & semester end examinations, ensure the attainment of learning outcomes (both the LOs as stated in prescribe syllabi and POs) and also create an opportunities for overall development. Whereas graded internal evaluations are conducted as per the guidelines given by the Board of Studies of respective subjects. The outcomes of these evaluations are final and the results of these evaluations are used to allot credits and grades and to make a decision to award the degree/s or not.

Thus, the college examination committee had prepared the following guidelines for the conduction of the CIE and share with the faculties for implementation.

1. Discuss the university examination pattern with the students including credits requirement to pass the year/programme, and additional credits.
2. Share the COs, PSOs, and POs with the students before the beginning of each programme/semester to ensure that what the students is expected to gain from a specific course/subject/program.
3. Evaluation can be of different types – diagnostic (pre-assessment), formative (conducted during the course of learning sequence), summative (at the end of learning experience)
4. Plan the CIE to ensure the attainment of COs, PSOs, and POs.
5. Different evaluation techniques can be used to measure the attainment of each CO/PSO/PO. Although, the list of techniques mentioned below is comprehensive but not limited. Teacher can choose the techniques from the given list or apply their creativity to develop new technique.

✓ Maintaining Learning Dairy	✓ Participation in
✓ Unit Test: Descriptive/Objective	seminar/conferences/workshops
✓ Home Assignment	✓ Writing an article, poem, short stories
✓ Tutorials	✓ Preparation of models
✓ Open Book Test	✓ Group discussions
✓ Surprise Test	✓ Study/Industrial visits

6. CIE can be conducted using different modes, i.e., offline/face-to-face or online/virtual mode.
7. For Non-graded assessment, evaluation can be done by teacher, peer, or by the students themselves
8. As per the NAAC guidelines for E-governance in internal examination, it is important to promote the use of technology in internal evaluations.
9. To promote transparency in internal evaluation prepare grids and rubrics for each course and keep a record with the department, to share with stakeholders if required.
10. Discuss the grids and rubrics with every student to inform them about how their learning will be evaluated at each stage of learning.
11. Prepare the time table of CIE (graded and non-graded) before each semester and share it with the students.
12. Non-graded assessments and graded assessment of 10% marks (5/10/20) out of total marks has to be conducted at the departmental level under the guidance of head of respective department as per the guideline of BoS. For example, for course with 100 marks weightage graded evaluation for 10 marks and for course with 50 marks weightage graded evaluation for 05 marks will be conducted by the department.
13. Only **ONE** graded assessment of 20% marks out of total marks will be conducted at the institutional level under the guidance of principal. For example, for course with 100 marks weightage graded evaluation for 20 marks and for course with 50 marks weightage graded evaluation for 10 marks will be conducted by the college examination committee. The separate time table will be prepared by the college examination committee and shared with students and teachers at least 10 days before the commencement of these exams.
14. Subject teachers should do every evaluation with at most care and un-biased manner.

COLLEGE EXAMINATION COMMITTEE

15. The results of CIE have to be declared by the department within 10 days from the last day of internal exam.
16. Each department has to organize OPEN DAY share students' performance with them and their parents and to respond to their grievances regarding CIE, if any.
17. The record of CIE and OPEN DAY has to be maintained at the departmental level and can be shared with the college examination committee when required.
18. Supplementary CIE will be conducted under special conditions with the permission of principal for those students who remain absent for the CIE due to medical reasons or they were representing college in sports/cultural/NSS/NCC activities during the days of CIE. But they have to inform the concern head of department with an application prior to conduction of CIE. This supplementary exam will be conducted at the departmental level and the report of same will be communicated to college examination committee with seven days from the last day of exam.
19. Subject teacher has to ensure that all students enroll for this subject has participated in CIE and make sure no student is left behind.
20. Subject teacher has to submit the mark of CIE to SPPU, Pune through online portal when notified by the university.

Can make a case for the choice of research Techniques if needed	Works in accordance with the safety rules and procedures. Uses the common used research techniques correct.	Must be reminded several times to the safety rules and procedures. Has less knowledge about common used research techniques	Not Following no safety rules and procedures included in his/her routine Can't make a case for the choice of research techniques if needed	No safety rules followed Doesn't determine on his/her own which research technique is most appropriate
Visual Appeal (10M)	There are no errors in spelling, grammar and punctuation. Information is clear and concise on each slide. Visually appealing/engaging.	There are some errors in spelling, grammar and punctuation. Too much information on two or more slides. Significant visual appeal.	There are many errors in spelling, grammar and punctuation. Too much information was contained on many slide	There are many errors in spelling, grammar and punctuation. The slides were difficult to read and too much information had been copied onto them. No visual appeal.	No demonstration of work done in the industry and no understanding of project objectives.
Comprehension (10M)	Extensive knowledge of topic. Members showed complete understanding of assignment. Accurately answered all questions posed.	Most showed a good understanding of topic. All members able to answer most of audience questions.	Few members showed good understanding of some parts of topic. Only some members accurately answered questions.	Presenters didn't understand topic. Majority of questions answered by only one member or majority of information incorrect.	Errors in topic related issues

Presentation Skills (10M)	Regular/constant eye contact, The audience was engaged, and presenters held the audience's attention. Appropriate speaking volume & body language.	Most members spoke to majority of audience; steady eye contact. The audience was engaged by the presentation. Majority of presenters spoke at a suitable volume. Some fidgeting by member(s).	Members focused on only part of audience. Sporadic eye contact by more than one presenter. The audience was distracted. Speakers could be heard by only half of the audience. Body language was distracting.	Minimal eye contact by more than one member focusing on small part of audience. Majority of presenters spoke too quickly or quietly making it difficult to understand. Inappropriate body language.	No reply to the questions asked by examiner(s).
Content (10M)	The presentation was a concise summary of the topic with all questions answered. Comprehensive and complete coverage of information.	The presentation was a good summary of the topic. Most important information covered; little irrelevant info.	The presentation was informative but several elements went unanswered. Much of the information irrelevant; coverage of some of major points.	The presentation was a brief look at the topic but many questions were left unanswered. Majority of information irrelevant and significant points left out.	Content not related to topic as well as incomplete
Preparedness/ Participation/ Group Dynamics (10M)	All presenters knew the information, participated equally, and helped each other as needed. Extremely prepared and rehearsed.	Slight domination of one presenter. Members helped each other. Very well prepared.	Significant controlling by some members with one minimally contributing. Primarily prepared but with some dependence on just reading off slides.	Unbalanced presentation or tension resulting from over-helping. Multiple group members not participating.	It includes none of the following : Detailed idea of project(s) . Outcome/ result of project(s) Team leader/ team member
Report Writing (10M)	Very few spelling errors, correct punctuation, grammatically correct, complete sentences.	Occasional lapses in spelling, punctuation, grammar, but not enough to seriously distract the reader.	Numerous spelling errors, non-existent or incorrect punctuation, and/or severe errors in grammar that interfere with understanding.	Spelling mistakes in report writing, Poor grammar etc.	Missing of the content, Grammatical Mistakes
Presentation / Personalism (5M)	Speaker is appropriately dressed, avoids distracting body language during presentation, comports him/her self professionally throughout the presentation	Speaker is appropriately dressed, generally acts professionally, but exhibits some minor lapses in decorum	Speaker is reasonably dressed, but some lapses in decorum detract from the presentation's impact	Speaker is not dressed appropriately for the audience, does not present him/her self in a serious and professional manner	Given no reply to the questions asked by examiner(s).

Experimental design	Design shows student has analyzed the problem and has independently designed and conducted a thoughtful experiment.	Design shows student grasps the basic idea of the scientific process by conducting experiment that controlled obvious variables.	Design shows student grasps basic idea of scientific process but needs some help in controlling obvious variables.	Design shows student can conduct an experiment when given considerable help by the teacher.
Data Collection	Data was collected and recorded in an orderly manner that accurately reflects the results of the experiment.	Data was recorded in a manner that probably represents the results of the experiment.	Data was recorded in a disorganized manner or only with teacher assistance.	Data was recorded in an incomplete, haphazard manner or only after considerable teacher assistance.
Scientific Results	Explained with convincing clarity the solution to the problem. Information from other sources or other experiments was used	Showed that student understands the results and knows how to explain them.	Showed results of experiment. Conclusions reached were incomplete or were explained only after questioning.	Showed results of the experiment. Conclusions drawn were lacking, incomplete, or confused.
Verbal expression	Speech presented a clearly defined point of view that can be supported by research. Audience interest was considered as were gestures, voice and eye contact.	Speech was prepared with some instructor help but uses experiment's result. Speech was logical and used gestures, voice and eye contact to clarify meaning.	Speech was given after active instruction. Some consideration was given to gestures, voice and eye contact.	Speech was given only after active instruction.
